

Assemble as shown

As a general rule that applies to all our products, tighten all fasteners very tight.

Note:

When setting the pins to your desired positions make sure the BIG bolts are very, very tight as well. You can use the felt pads to perfectly protect your powder coated paint if you want but they are not needed.

The felt pads for the big bolts will allow the pins to rotate a little because they are soft. You will have a more positive contact to the frame without them.

** Disclaimer – parts can vary in size and quantities can also vary without notice. These images may not necessarily reflect the exact look that your PICKER currently has. If you have any questions at all, please don't hesitate to call 480.338.7686
